DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group III, namely Fig. 4A and claims 7-10, 17, 25-27 and 34, in Paper No. 13 is acknowledged. However, claims 7-10, 17, and 25 do not read on the elected species Group III as independent claim 7 recites at least two additional doors for respective access to at least two mail compartments in the mailbox. The species shown and described as Fig. 4A includes only one door for access to one mail compartment in the mailbox.
2. Consequently, claims 7-11, 14, 15, 17-25, and 28-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Drawings

3. The drawings filed 12-24-01 are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the door (claims 26 and 34) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
4. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
5. The proposed drawing corrections received on 02-11-2002 are approved by the examiner.

Claim Objections

6. Claim 34 is objected to because of the following informalities: lines 4-5 - delete the phrase "the decontamination system and operatively connected to". Appropriate correction is required.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 26, 27, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Zimlich Jr. et al. (US#5814532).

9. Regarding claim 26, Zimlich discloses a decontamination container 2 comprising: a door 18 for allowing access to the interior 8 of the container; a decontamination system 10-12 operatively connected to a controller (Fig. 3); and a keyed start switch 54 used to send a decontamination start signal to the system.

10. Regarding claim 27, the controller includes a communications device 50 capable of providing status information to a user.

11. Regarding claims 26 and 27, although Zimlich fails to specifically disclose the container as a "mailbox for decontaminating mail," the applicant is reminded that mail is not being positively claimed and therefore represents the intended use of the invention. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior

art. If the prior art structure is capable of performing the intended use, then it meets the claim.

In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). In this case, the Zimlich container includes all the claimed mailbox structure and is capable of decontaminating mail.

12. Regarding claim 34, Zimlich discloses a decontaminating device including a decontamination chamber 2 comprising: a door 18 for allowing access to the interior 8 of the chamber; a decontamination system 10-12 operatively connected to a controller (Fig. 3); and a keyed start switch 54 used to send a decontamination start signal to the system.

13. Regarding claim 34, although Zimlich fails to specifically disclose the decontamination system "for decontaminating mail", the applicant is reminded that mail is not being positively claimed and therefore represents the intended use of the invention. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). In this case, the Zimlich decontamination system is capable of decontaminating mail.

Response to Arguments

14. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
